

## Carlo Resta (very short bio)

My name is Carlo Resta, and I got a PhD in *Energy, Systems, Territory and Construction Engineering* (a mouthful) from the University of Pisa in 2024. Since 2015, I've been a member of the volunteer association [Ingegneria Senza Frontiere](#) (*Engineering Without Borders*).

My background is in civil engineering. For a few years, both before and during my time as a PhD student, I studied heritage buildings and the way they behave and misbehave, focusing mostly on the Leaning Tower of Pisa. All of my research required some amount of computer programming (usually very simple stuff). If for some reason you want to take a look please see either my [ORCID](#) or my [ResearchGate](#) profiles.
